DATA TRANSMITTING DIGITAL SPEED GOVERNORS (DTSG)

Introduction

"The ultimate speed governor
where all others fail"

Ekas Fleet King (Ekas FK 2017) is a transducer based, data transmitting digital speed governor.

It has been developed by hardy Ekas Digital Governor team. Its manufactured by Ekas Technologies which has over 17 years of experience in speed governor development and manufacturing.

Specification

Ekas FK 2017 operates on 12/24 volts therefore suitable for all vehicles regardless of the voltage. It is most versatile unit as it can use all known methods to pick speed from in-build signal generator in a newer vehicle, gear box mounted transducer or from GPS signal.

Ekas FK 2017 is able to store data in an internal non-erasable memory for 72hrs and 30days in our serve. It also monitor the global position of the vehicle by longitudes and latitudes alongside the speed and able to transmit the same to our server in real time on daily basis.

Ekas FK 2017 comes with a free tracking platform and individual mobile phone app. It also comes with a one year warranty.

Real time tracking

Advantages of FK 2017

- Easy to retrieve data.
- Accurate speed control.
- Operates on 12/24V therefore suitable for all vehicles regardless their voltage.
- Easy to install.
- Enhance real-time tracking for self management
- Does not stall.
- Maintains speed at set speed with little variation
- Optional mobile printer for data self download
- Free computer platform for SACCOs and individual mobile app to prevent harassment

Ekas FK 2017 Functions

Ekas Fleet King consist of three basic parts:-

Speed Governor – The Speed Governor maintains speed consistency at 80km/hr and does not go below 79km/hr on speed control.

Speed Recorder – Stored data onboard in a non-erasable memory for a period of 72hours

GPS/GPRS Fleet Management (Tracker) – Enable global positioning of the vehicle, real-time tracking, transmission of real-time speed data to the server.

FK 2017 OFFERS YOU...

complete insight into all aspects of fleet operations. Our GPS tracking solutions provides real-time location, unlimited history, comprehensive reports, notifications and alerts, and messaging - all immediately available and at your fingertips, using a simple and intuitive interface.

This device is manufactured in compliance with the requirements of KEBS(KS2295 part 1 & 2.) CMTE and NTSA specifications

NOTE

All new speed governors are transducer / vehicle speed sensors. GPS speed governors are not allowed under the new standards. Our clients should be cautious.
